

## CIRCULAR SAW FIREWOOD PROCESSORS (CORD KING CS-SERIES)

It's a proven fact that the Cord King CS-Series has the fastest production rate on the planet. Using a carbide tooth slasher saw, CS-Series models quickly cut through lumber. Cord King's CS-Series are also the only processors available with a 4- to 28-way hydraulically adjustable splitting system. CS-Series features include:

- ▶ Fastest cut-to-cut cycle time (3 to 5 seconds)
- ▶ 4 to 10 full cords per hour production rate
- ▶ 42-ton splitter (standard), with 58- and 72-ton splitters also available
- ▶ Lifetime splitting chamber warranty
- ▶ Fully built to your spec

### CS27-40 SPECIFICATIONS

**Saw:** 44 tungsten carbide teeth circular saw

**Engine:** 140 HP diesel tier III (John Deere or CAT engines recommended)

**Fuel capacity:** 30 gallon fuel tank

**Hydraulic oil reservoir:** 130 Gallons

**Hydraulic oil cooler capacity:** 48,000 BTU/hour

**Weight:** 14,000 pounds, including tandem axle and electric brakes

**Hitch:** Pintle ring hitch

## CHAINSAW FIREWOOD PROCESSORS (CORD KING M-SERIES)

Cord King's M-Series processors use high-quality harvester bar saws to cut wide-diameter logs. The M-Series range has the highest production rate in its category. Though slower than a circular saw, our bar saw processors are highly productive mobile machines, ideal for jobs where time is not a critical factor. M-Series features include:

- ▶ Ability to cut the widest-diameter logs
- ▶ 1.5 to 5 full cords per hour production rate
- ▶ 29-ton splitter (35-ton ram also available)
- ▶ Lifetime splitting chamber warranty
- ▶ Fully built to your specs

### FULLY CUSTOMIZABLE

M-Series models are fully customizable to your exact specifications. Let us know the log size you work with and we can build a machine tailor-made to your needs. Give us a call for more information!

### M24-30 SPECIFICATIONS

**Saw:** Hydraulic-driven 32" saw with pressure relief system  
**Engine:** 60 HP CAT diesel  
**Fuel capacity:** 25-gallon fuel tank  
**Hydraulic oil reservoir:** 65 gallons  
**Weight:** 8,850 pounds, including tandem axle and electric brakes  
**Hitch:** 2 and 5/16" ball hitch

Our accessories give you even greater control over your finished product and can easily be added to any machine. Our line of products includes a full range of debris and offloading conveyors, debris separators, hydraulically adjustable splitting wedges, PTO and electric motors, as well as safety features and the world's only one-hand joystick operation.

### CONVEYORS AND SEPARATORS

The Grizzly debris separator removes up to 80% of debris from the wood pile or truck, and when paired with the Tumble King debris tumbler, you can keep your finished product clean while separating sawdust and smaller pieces for kindling and other by-products. Cord King debris and offloading conveyors help you keep any mess under control while ensuring easy stacking of cords.

### MACHINE ADD-ONS

All Cord King processors have the option of a PTO or electric motor for added functionality. Our Grapple Assist helps even the most crooked logs feed properly and stay stable during cutting. Trap doors allow for smooth log transition, and our automatic splitter streamlines any job.

### EVEN MORE CUSTOMIZATION OPTIONS (ADD-ONS & ACCESSORIES)

### OVERNIGHT PARTS REPLACEMENT (BUILT TO SPEC ON-SITE)

We build all Cord King machines on-site from raw materials. Every component is built from scratch, which means replacement parts are just a phone call away. Getting parts is never an issue! Unlike other firewood processors on the marketplace, when you call us for a replacement, we're able to ship overnight for installation the next day.

### LESS MAINTENANCE

Because Cord King machines have less than half the moving parts of other processors on the market, maintenance takes a fraction of the time. All our processors are built to last and give you exceptional service and value for years to come. When you choose Cord King, you're choosing a reliable manufacturer that stands behind their product.
